**Trombetta To Participate at IUV Technology 2007**

IUV Technology 2007 will focus on the latest advancements in the design, engineering and manufacturing of lift trucks, industrial & utility vehicles, mobile equipment and special-purpose off-highway vehicles and equipment. Topics discussed will include new developments in technology, market conditions and end-user requirements that are driving innovation, new product capabilities and features, application trends and performance improvements today and in the future.

“Our goal is to provide you with the opportunity to network with others in the business,” said Peter Armour, President of Long Pond Publishing (publisher of IUV Magazine). “It’s a chance to share ideas, innovations, and developments taking place across the industry.”

The conference is organized by Industrial Utility Vehicle magazine and produced by Long Pond Publishing, the magazine’s publisher.

Based in Menomonee Falls, Wisconsin, Trombetta has been a leading manufacturer of industrial work solenoids, DC contactors, electronic controls, and engineering services for 75 years.
