

For Immediate Release
June 10, 2003

Bear DC Contactor Family

This DC contactor is used for switching current between the power source and the load. Transportation and large machinery applications are excellent candidates for the Bear.

The Bear is named for its strong construction and high current carrying capability. While it is the largest in size, the Bear provides an economical solution to high current switching applications.

Based in Menomonee Falls, Wisconsin, Trombetta has been a leading manufacturer of industrial work solenoids, DC contactors, electronic controls and engineering services for over seventy years.
