Custom Electric Solenoid Kit allows flexible mounting in a convenient location

Menomonee Falls, WI USA- Trombetta Motion Technologies provides application flexibility with electric solenoid kit.

This patented product offers ultimate application flexibility. The solenoid can be mounted in a convenient, environmentally safe location by attaching a cable to the load, and routing the cable to the solenoid. The cable allows adjustments to be made to set the stroke to meet the application needs. Applications include engine fuel shut-off, throttle control, and compression release used in compressors and generators.

Under normal environmental conditions the solenoid Cable Kit has a stroke of 1½ inches and a force up to 21 pounds. Trombetta's solenoid Cable Kit is easy to mount in crowded areas and simple to adjust for your application.

Trombetta has a wide range of electric solenoid actuators and controls for a variety of applications. Any of Trombetta's solenoid actuators or controls can be customized to meet your specific application requirement.

Founded in 1932, Trombetta is a fully integrated manufacturer of custom solenoids and controls. Trombetta offers complete engineering services in addition to state-of-the-art manufacturing capabilities.
